SUPUN NIMANTHA

SENIOR FULL-STACK SOFTWARE ENGINEER
022-029-0157 | supunnimantha.edu@gmail.com | Auckland, New Zealand
LinkedIn | Portfolio | Fiverr | GitHub
Core Tech Stack: C#.NET, React, Next.js, TypeScript, JavaScript, jQuery, Python, Django, SQL Server, Azure, AWS, Terraform, AI-assisted development & AI integrations
Work Rights: Open Work Visa - valid until 03 Jun 2029

WORK EXPERIENCE

FoodME Ltd (DIY Meal Kit Favour) 🌐, Auckland, NZ

Full-Stack Software Engineer - Part-time Contract Jul 2026 - Present

Project: AWS-to-Azure Cloud Migration

- Migrate Django and supporting services from AWS to Azure, retaining the AWS environment during transition.
- Provision Azure App Service, Azure Database for MySQL Flexible Server, Blob Storage, Key Vault, API Management (APIM), VNet integration and Private DNS with Terraform for reproducible environments.
- Maintain React Native features and bug fixes; validate mobile changes with Android Emulator and iOS TestFlight builds.
- Use Codex and computer-use skills to test mobile app workflows with Android emulators and validate UI behaviour.
- Use Claude Design for user-interface design and refinement.
- Investigate AWS cost drivers and identify savings opportunities through database lifecycle upgrades, redundant resource reviews and log retention planning.
- Document migration runbooks and infrastructure-as-code for consistent environment setup.

Tech: Django | Python | React Native | Apify | Terraform | Azure App Service | Azure MySQL Flexible Server | Azure Blob | APIM | VNet | Private DNS | AWS Lambda | S3 | RDS | CloudFront | Azure Key Vault | Codex | Computer-use skills | Claude Design | TestFlight | Android Emulator

AvanSight Inc. 🌐, CA, USA | Project engagement | Jun 2026 - Present

Project: AI Report Builder & Trial Master File (TMF) Digitalization

- Introduced AI-assisted digitalization of Trial Master File (TMF) clinical reports, using Azure Document Intelligence for extraction and Azure OpenAI for interpreting and structuring report content.
- Developed a QA Agent module to validate digitised reports and automatically create tickets in the DartAI platform when issues were detected.
- Delivered a production AI report platform with a .NET API, Next.js frontend and xUnit tests, reviewing AI-assisted implementation and refactoring.
- Developed multimodal AI annotation of scanned and handwritten clinical-exam PDFs, assigning confidence levels and routing uncertain findings for human review.
- Enabled PDF-to-Word generation with sandboxed execution, retries and source validation; added versioned prompts for non-technical updates.
- Orchestrated resilient server-side pipelines for annotation, SharePoint delivery and report generation, with Teams notifications, restart handling, model concurrency controls and Azure usage/cost monitoring.
- Migrated GitHub repositories to self-hosted Gitea with Gitea Actions CI/CD; deployed Gitea with Docker on a Hostinger Ubuntu VPS, set up a SoftEther VPN server for access to protected Azure services, and hardened the server with fail2ban.
- Developing a narrative-generation workflow using Microsoft Agent Framework, MCP and LangChain, with prompt engineering and RAG over digitised TMF and Word reports using embeddings and a vector database.

Tech: C# | ASP.NET Core | Next.js | TypeScript | Python | xUnit | Azure OpenAI | Azure Document Intelligence | Microsoft Graph | SharePoint | Teams Webhooks | Entra ID | Docker | Linux | Ubuntu | Caddy | Gitea | Gitea Actions | Hostinger VPS | SoftEther VPN | fail2ban | Claude Code | Codex | Computer-use skills | Claude Design | Microsoft Agent Framework | MCP | RAG | Vector Databases | Embeddings | LangChain | Prompt Engineering | Multimodal AI | Human-in-the-loop Validation

FoodME Ltd (Favour) 🌐, Auckland, NZ

Full-Stack Software Engineer Intern - MSc Capstone (A+) Nov 2025 - Feb 2026

Project: Retailer Integrations & AI Product Matching

- Created React Native screens and application logic for Woolworths and New World integrations, including product selection, store-specific pricing and cart workflows.
- Used Claude Design and Cursor to develop and refine mobile user interfaces and application workflows.
- Expanded Django REST API services supporting retailer products, recipes, ingredients and supplier-aware workflows.
- Automated the collection, processing and maintenance of thousands of supermarket product and recipe records using Python/Selenium pipelines.
- Built an OpenAI-powered product-classification pipeline that assigned primary ingredient tags to 6,471 of 8,687 New World products (74.5% coverage), with structured-output validation, label normalisation, confidence checks and non-food filtering.

Tech: React Native | Redux | Django | Python | Selenium | OpenAI | REST APIs | AWS Lambda | S3 | RDS | CloudFront | Claude Design | Cursor | TestFlight | Android Emulator

AvanSight Inc. 🌐, CA, USA Apr 2020 - Apr 2025

Team Lead Software Engineer and Offshore Manager

Project: Clinical Trial Management Platform

- Built the prototype Clinical Trial System that later expanded into AvanSight's multi-company clinical research platform.
- Evolved platform modules from ASP.NET MVC, JavaScript, jQuery, Ajax, Bootstrap and LESS to TypeScript, React, Next.js and Web API, backed by SQL Server.
- Engineered data-intensive workflows with GraphQL, HotChocolate, Dapper, stored procedures, AG Grid, Zustand and TanStack; built AMCharts visualisations with drill-down reporting.
- Established CI/CD pipelines with Jenkins and GitHub Actions, applying TDD, unit testing, code reviews and secure API practices.
- Led 8 developers, 3 QA engineers and a Product Manager delivering CRO study and FDA submission workflows; provided technical leadership, recruited and mentored engineers, allocated work, and organised knowledge-sharing and team-building activities.

Tech: ASP.NET MVC | Web API | React | Next.js | TypeScript | JavaScript | jQuery | Bootstrap | LESS | Tailwind | AG Grid | SQL Server | Dapper | Stored Procs | GraphQL | HotChocolate | Unit Testing | GitHub Actions | Docker | Jenkins | Ajax | AMCharts | TDD | OWASP | JWT | OAuth | RBAC | LINQ | Reflection | OpenAPI | Swagger | Scalar | Postman | MongoDB | Azure AI Foundry | Jira | Confluence | Zustand | TanStack

Fajar Agung Group, Indonesia - Concurrent project-based contracts 2017 - 2025

Full-Stack Software Engineer (Remote Contract)

Project: Field Staff Tracking & Task Management

- Directed a developer and QA engineer in delivering mobile and web functionality for real-time staff tracking, task management and attendance monitoring.
- Enabled offline synchronisation and Firebase-backed mobile workflows; integrated Google Maps APIs for directions, navigation and GPS location tracking.

Tech: ASP.NET MVC | SQL Server | Entity Framework | React Native | NativeWind | Firebase | Google Maps APIs

Project: Fleet, Inventory & Warehouse Management

- Designed, developed, tested and delivered an enterprise Fleet Management System with inventory and warehouse modules, bilingual support, real-time reporting and role-based access.
- Extended Inventory Control System modules to support purchasing, stock and operational workflows.
- Implemented responsive web/mobile features and hosted supporting services on AWS EC2/RDS infrastructure.

Tech: ASP.NET MVC | SQL Server | Bootstrap | Entity Framework | React | Next.js | MySQL | Docker | jQuery | AWS EC2 | RDS | Route 53

Hostgsm LLC, USA - Concurrent project-based contracts 2017 - 2025

Full-Stack Software Engineer (Remote Contract)

Project: Transport Reservation & Dispatch SaaS

- Coordinated development and QA of a multi-tenant Transport Reservation & Dispatch SaaS platform, replacing a legacy bus booking system.
- Integrated VOIP/SMS functionality with dashboards and responsive reservation and dispatch workflows.
- Expanded frontend and backend functionality using React / Next.js, Web API and EF Core, with Kafka used in backend processing.
- Improved the bus booking web application with new modules, UI enhancements and responsive design.
- Created Inventory Lookup and Bus Booking desktop tools.

Tech: WinForms | Web API | EF Core | SQL Server | React | Next.js | Docker | Kafka

EmetSoft, Sri Lanka - Multiple Contracts Feb 2016 - Jul 2019

Trainee / Full-Stack Software Engineer

Project: Municipal ERP & Online Payments

- Modernised financial and municipal ERP modules covering rate collection, taxation, treasury operations in Sri Lanka, HR and licensing, migrating legacy VB6 functionality to VB.NET.
- Integrated payment gateways and online rate collection for Colombo Municipal Council (CMC) and Dehiwala-Mount Lavinia Municipal Council (DMCC).

CMC TAX | DMCC TAX

- Contributed to architectural planning for gradually transitioning specific ERP capabilities from the modular platform toward microservices.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | Crystal Reports | Payment Gateway | Microservices | VB.NET

Project: Field Service Management

- Implemented a web-based back office and native Android application for job assignment, attendance, leave management and operational reporting.
- Integrated Google Maps APIs for directions, navigation and real-time GPS tracking of 30-40 field officers.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | Android | Google Maps APIs | Crystal Reports

Project: Cemetery Management

- Deployed a Cemetery Management System for Colombo Municipal Council, supporting operations across approximately 50 acres with Google Maps and DroneDeploy integration.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | Google Maps APIs | Drone Mapping

OTHER TECHNICAL PROJECTS

Master of Software Engineering Project Jul 2025 - Sep 2025

Project: Vision Testing App with Gamification For Young Children

- Developed an interactive vision acuity testing platform integrating clinical precision with gamified engagement for children, including Engagement Game, Visual Acuity Scale, and planned OKN-FAST with adaptive difficulty, logMAR scaling and data export.

Live App | Demo Video

Tech: React | Zustand | Tailwind | jQuery | Python | FastAPI | PostgreSQL | OpenAI | GitLab

Andere Corporation, USA 2017 - 2019

Project: Employee Handbook Creator

- Enhanced the Employee Handbook Creator to support compliance across all 50 US states, with company profiles and user-level management.
- Automated Texas handbook creation through a questionnaire-driven workflow, Word document generation, document management and AWS deployment.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | AWS EC2 | AWS RDS | Route 53

WorkInDK, Denmark Jan 2017 - Dec 2017

Project: Job Recruitment Portal

- Launched a recruitment portal used by hundreds of candidates and 50+ companies, with CV creation and PDF generation.
- Added profile management, resume building, job search, notifications, PDF generation, reporting and automated database backups.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | RDLC | Rotativa

NewGLink Corp, USA Feb 2019 - Apr 2019

Project: BCBA Web Portal

- Delivered a BCBA web portal for a New Jersey school, enabling behaviour tracking, reporting and real-time communication for students and staff.
- Established real-time application communication using SignalR 2.

Tech: ASP.NET MVC | Entity Framework | SQL Server | jQuery | Bootstrap | SignalR2

EDUCATION & CERTIFICATION

Master of Software Engineering | Yoobee Colleges, Auckland | 2025 - 2026 | Results: 7 A+ and 1 A

BSc Management Information Systems | University College Dublin | 2012 - 2015 | GPA: 3.58 | OCPJP Certification 2014

ADDITIONAL EXPERIENCE

Fiverr.com - Freelance Software Developer & Tutor Jan 2014 - Aug 2023

- Completed 650+ software projects with a 100% 5-star client satisfaction rating, working directly with a diverse international client base across multiple sectors.
- Mentored 100+ students in software development and programming.

National School of Business Management - Programming Instructor Nov 2014 - Apr 2015

- Taught programming fundamentals and practical software development to 100+ BSc students while supporting lab maintenance and examination activities.

OTHER FAMILIAR AREAS

Node.js | Express.js | Hangfire | RabbitMQ | Kafka | Event-driven architecture
