SUPUN NIMANTHA

FULL-STACK SOFTWARE ENGINEER
WORK RIGHTS : OPEN WORK VISA (03.06.2026 - 03.06.2029)

Full-Stack Software Engineer and Technical Lead with 10+ years of experience delivering enterprise software solutions across clinical trials, healthcare, finance, government, transportation, logistics, and e-commerce sectors. Skilled in solution architecture, full-stack development, cloud technologies, and technical leadership, with expertise in .NET, React, React Native, Next.js, GraphQL, AWS, Azure, Docker, and Kubernetes. Proven success in leading cross-functional teams, delivering FDA-regulated clinical trial platforms, modernizing legacy systems, and building scalable SaaS and enterprise applications serving thousands of users worldwide.

WORK EXPERIENCE

FoodME Ltd (DIY Meal Kit Favour), Auckland, NZ
Full-Stack Software Engineer (Part-time Contract) 2026.07–Present
Full-Stack Software Engineer Intern (MSc Capstone – A+) 2025.11–2026.02

- Developed React Native frontend features for Woolworths and New World integrations, including product selection, store-specific pricing, and cart integration.
- Built and enhanced Django backend services and REST APIs supporting retailer products, recipes, ingredients, and supplier-aware workflows.
- Developed Python and Selenium pipelines to scrape, process, and maintain thousands of supermarket product and recipe records.
- Implemented AI-powered ingredient-to-product matching using OpenAI, validation, confidence scoring, filtering, and caching.
- Implementing an AWS-to-Azure migration using Terraform to provision Azure App Service, Azure Database for MySQL, VNet integration, and private DNS.

AWS Lambda, S3, RDS, CloudFront Azure App Service, Blob, APIM Terraform

AvanSight Inc., CA, USA 2020.04 - 2025.04
Team Lead Software Engineer and Offshore Manager

- Built the prototype Clinical Trial System that led to the founding of AvanSight, which later expanded into a multi-company platform.
- Led a cross-functional team of 8 developers, 3 QA engineers, and a Product Manager, successfully delivering FDA submissions for partner CRO clinical studies.
- Gathered requirements, created and allocated technical tasks, and facilitated Agile processes, including Daily Scrum and Sprint Planning, using Jira and Confluence.
- Built and maintained CI/CD pipelines using Jenkins and GitHub Actions to automate application builds, testing, and deployments.
- Conducted code reviews, wrote unit tests, mentored team members, and facilitated technical knowledge-sharing.
- Delivered product demonstrations to stakeholders, led technical interviews, and supported wider company initiatives and events.

EDUCATION

- 2014
OCPJP Certification
- 2012 - 2015
BSc in Management Info. Systems
GPA : 3.58
University College Dublin, Ireland
- 2025 - 2026
Master of Software Engineering
Results : 7 A+ and 1 A
Yoobee Colleges, Auckland

SKILLS/ATTRIBUTES

- Fast Learner and Quick Adopter
- Leadership Skills and Teamwork
- Self-Motivated and Dedicated
- Time Management
- Effective Communication
- Problem Solving and Critical Thinking
- Minimal Supervision
- Mentoring

REFERENCES

- Available Upon Request

Hostgsm LLC, USA - (Multiple Contracts) 2017 - 2025
Full-Stack Software Engineer (Remote)

- Led a developer and QA engineer team in delivering a Transport Reservation & Dispatch SaaS platform, migrating a legacy bus booking system and implementing VOIP/SMS integration, dashboards, and multi-tenancy.
- Enhanced a bus booking web app with new modules, UI, and responsive design.
- Converted previously built desktop bus booking app into a web-based solution.
- Developed desktop apps including an Inventory Lookup system and Bus Booking system to improve operation .

WinForms WEB API EF Core SQL Server React Next.js Docker Kafka

Andere Corporation, USA - (Multiple Contracts) 2017 - 2019
Full-Stack Software Engineer (Remote)

- Enhanced the Employee Handbook Creator to support compliance across 49 U.S. states, adding company profile and user-level management features.
- Developed a questionnaire-based Employee Handbook Creator tailored for Texas compliance, with automated Word file generation and AWS deployment.

NewGLink Corp, USA 2019.02 - 2019.04
Full-Stack Software Engineer (Remote)

- Developed a BCBA web portal for a school in New Jersey, USA, enabling behavior tracking, real-time communication, and reporting for students and staff.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap SignalR2

WorkInDK, Denmark 2017.01 - 2017.12
Full-Stack Software Engineer (Remote)

- Developed and deployed a Job Recruitment Portal used by hundreds of candidates and over fifty companies, featuring profile management, resume building, job search, notifications, PDF generation, reporting, and automated database backups.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap RDLC

EmetSoft, Sri Lanka - (Multiple Contracts) 2016.02 - 2019.07
Trainee / Full-Stack Software Engineer

- Integrated online rate payments into municipal ERP systems, enabling taxpayers in Colombo and Dehiwala—two of Sri Lanka's largest municipal councils—to make payments online and improving operational efficiency.
- Developed and modernised ERP modules across finance, HR, taxation, municipal administration, and licensing, migrating legacy VB6 functionality to VB.NET.
- Contributed to architectural planning for gradually transitioning selected capabilities from the modular ERP platform toward microservices.
- Delivered a Field Service Management System with a web-based back office and Android application for job assignment, attendance, leave management, and operational reporting.
- Implemented real-time location tracking and field-work monitoring for 30–40 officers, improving visibility and coordination of daily activities.
- Delivered a Cemetery Management System for the Colombo Municipal Council, supporting operations across approximately 50 acres with Google Maps and DroneDeploy integration.
