EDUCATION

Master of Software Engineering
Yoobee Colleges, Auckland | 2025-2026
Results: 7 A+ and 1 A
BSc Management Information Systems
University College Dublin | 2012-2015
GPA: 3.58
OCPJP Certification
2014

CORE LANGUAGES

C# / VB.NET
JavaScript / TypeScript
Python / Java / SQL

BACKEND

ASP.NET Core / MVC / Web API
Entity Framework / Dapper / LINQ
REST / OpenAPI / Swagger
GraphQL / HotChocolate
Django / FastAPI / Node.js
Kafka / Hangfire / RabbitMQ

FRONTEND

React / Next.js
Redux / Zustand / TanStack
Tailwind / Bootstrap / LESS
HTML / CSS / JavaScript
Responsive Design / UI / UX

MOBILE

React Native
Native Android
NativeWind / TanStack
Offline / Real-Time Workflows

DATABASES / ORMS

SQL Server / Stored Procedures
MySQL / PostgreSQL / MongoDB
Entity Framework / Dapper
RDBMS / ERD / Code First

CLOUD / DEVOPS

Azure App Service / Blob / APIM
Azure VNet / Private DNS
AWS EC2 / RDS / S3 / Lambda
CloudFront / Route 53 / IAM
Terraform / Docker
GitHub Actions / Jenkins

AI / AUTOMATION

OpenAI / AI Integrations
Azure AI Foundry / Document Intelligence
Microsoft Agent Framework / QA Agents
MCP / Tools / Prompt Engineering
DartAI / QA Ticket Automation
Cursor / Claude / Copilot

SUPUN NIMANTHA

SENIOR FULL-STACK SOFTWARE ENGINEER

Core Tech Stack: .NET, React, Next.js, SQL Server, Azure, AWS, AI Integrations
Work Rights: Open Work Visa - valid until 03 Jun 2029

TECHNICAL EXPERIENCE

FoodME Ltd (DIY Meal Kit Favour), Auckland, NZ

Full-Stack Software Engineer - Part-time Contract 2026.07-Present
Project: AWS-to-Azure Cloud Migration

- Implementing migration of the Django application and supporting cloud services from AWS to Azure while keeping the existing AWS environment available during transition.
- Provisioning Azure App Service, Azure Database for MySQL, VNet integration and Private DNS using Terraform.
- Configuring Django application settings, MySQL connectivity and Azure network integration for the new environment.
- Maintaining infrastructure-as-code and migration runbooks so environments can be reproduced consistently.

Django Python Terraform Azure App Service Azure Database for MySQL Azure Blob APIM VNet Private DNS
AWS Lambda S3 RDS CloudFront

Full-Stack Software Engineer Intern - MSc Capstone (A+) 2025.11-2026.02

Project: Retailer Integrations & AI Product Matching

- Developed React Native screens and application logic for Woolworths and New World integrations, including product selection, store-specific pricing and cart workflows.
- Built and enhanced Django REST API services supporting retailer products, recipes, ingredients and supplier-aware workflows.
- Built Python/Selenium pipelines to scrape, process and maintain thousands of supermarket product and recipe records.
- Implemented OpenAI-based ingredient-to-product matching with confidence scoring, validation, filtering and caching.

React Native Redux Django Python Selenium OpenAI REST APIs AWS Lambda S3 RDS CloudFront

AvanSight Inc., CA, USA

2020.04-2025.04

Team Lead Software Engineer and Offshore Manager

Platform: Clinical Trial Management Platform

- Built the prototype Clinical Trial System that later expanded into AvanSight's multi-company clinical research platform.
- Developed full-stack platform modules using ASP.NET MVC / Web API, React and Next.js with SQL Server.
- Implemented data-intensive workflows using GraphQL / HotChocolate, Dapper, stored procedures, AG Grid, Zustand and TanStack.
- Built CI/CD pipelines with Jenkins and GitHub Actions and implemented unit testing, code reviews and secure API practices.
- Developed AI-assisted report digitisation modules using Azure Document Intelligence for extraction and OpenAI for interpreting and structuring report content.
- Developed a QA Agent module to validate digitised reports and automatically create tickets in the DartAI platform when issues were detected.
- Led and managed an offshore team of 8 developers, 3 QA engineers and a Product Manager; recruited and interviewed engineers, allocated technical work, mentored team members and coordinated delivery for CRO clinical studies and FDA submission workflows.
- Organised technical knowledge-sharing, company and team events, get-togethers and team-building activities to strengthen collaboration and engagement.

Fajar Agung Group, Indonesia - Multiple Project-Based Contracts

2017-2025

Full-Stack Software Engineer (Remote Contract)

Project: Field Staff Tracking & Task Management

- Led a developer and QA engineer in delivering mobile and web functionality for real-time staff tracking, task management and attendance monitoring.
- Implemented offline synchronisation, Firebase-backed mobile workflows and Google Maps integration for field operations.

Project: Fleet, Inventory & Warehouse Management

- Designed, developed, tested and delivered an enterprise Fleet Management System with inventory and warehouse modules, bilingual support, real-time reporting and role-based access.
- Developed and extended Inventory Control System modules to support purchasing, stock and operational workflows.
- Implemented responsive web/mobile features and deployed supporting services using AWS EC2/RDS infrastructure.

Firebase jQuery AWS EC2 RDS Route 53

ENGINEERING PRACTICES

Unit Testing / TDD
OWASP / JWT / OAuth / RBAC
Code Reviews / Mentoring
API Design / Performance / Caching
Agile / Scrum / Jira / Confluence

ARCHITECTURE / DELIVERY

CI/CD / Infrastructure as Code
Microservices / Event-Driven
Cloud Migration / Modernisation
Real-Time / Offline Sync
Technical Task Planning
Stakeholder Demonstrations

SELECTED INTEGRATIONS

Google Maps / Drone Mapping
Payment Gateways / VOIP / SMS
Supermarket Retailer Workflows
SignalR / GraphQL / REST APIs

REPORTING / UI

AG Grid / AMCharts / RDLC
Crystal Reports / Real-Time Reports
Figma / Theme Customisation
Webpack / Gulp

TOOLS / COLLABORATION

GitHub / GitLab / Pull Requests
Jira / Confluence / Trello
Postman / Swagger / Insomnia
Slack / ClickUp / Figma

AI ENGINEERING

Azure AI Foundry / Document Intelligence
OpenAI / AI Product Features
Microsoft Agent Framework / QA Agents
MCP / Tools / Prompt Engineering
DartAI / Ticket Automation
Cursor / Claude / Copilot
Copilot Studio

PLATFORM OPERATIONS

Azure DevOps / Entra ID
AWS CloudWatch / IAM / SNS
IIS / Nginx / PM2 / Plesk
Docker / Terraform
GitHub Actions / Jenkins

SELECTED CAPABILITIES

Legacy System Modernisation / SaaS /
Multi-Tenant Platforms
Mapping / Geospatial Features / Payments /
Retail Integrations
Technical Leadership / Mentoring / Problem
Solving / Critical Thinking

TECHNICAL EXPERIENCE - CONTINUED

Hostgsm LLC, USA - Multiple Project-Based Contracts

2017-2025

Full-Stack Software Engineer (Remote Contract)

Project: Transport Reservation & Dispatch SaaS

- Led development and QA delivery of a Transport Reservation & Dispatch SaaS platform, migrating a legacy bus booking system to a modern web solution.
- Implemented VOIP/SMS integration, dashboards, multi-tenancy and responsive reservation / dispatch workflows.
- Developed frontend and backend functionality using React / Next.js, Web API and EF Core, with Kafka used in backend processing.
- Enhanced the bus booking web application with new modules, UI improvements and responsive design.
- Converted a previously built desktop bus booking application into a web solution and developed Inventory Lookup / Bus Booking desktop tools.

WinForms Web API EF Core SQL Server React Next.js Docker Kafka

EmetSoft, Sri Lanka - Multiple Contracts

2016.02-2019.07

Trainee / Full-Stack Software Engineer

Project: Municipal ERP & Online Payments

- Integrated online rate payments into municipal ERP systems, enabling taxpayers in Colombo and Dehiwala to make payments online.
- Developed and modernised ERP modules across finance, HR, taxation, municipal administration and licensing, migrating legacy VB6 functionality to VB.NET.
- Contributed to architectural planning for gradually transitioning selected ERP capabilities from the modular platform toward microservices.

Project: Field Service Management

- Delivered a web-based back office and native Android application for job assignment, attendance, leave management and operational reporting.
- Implemented real-time location tracking and field-work monitoring for 30-40 officers.

Project: Cemetery Management

- Delivered a Cemetery Management System for Colombo Municipal Council, supporting operations across approximately 50 acres with Google Maps and DroneDeploy integration.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap Crystal Reports Android Google Maps APIs
Drone Mapping Payment Gateway Microservices

OTHER SELECTED TECHNICAL PROJECTS

Andere Corporation, USA

2017-2019

Project: Employee Handbook Creator

- Enhanced the Employee Handbook Creator to support compliance across 49 US states, adding company-profile and user-level management features.
- Developed a questionnaire-driven Texas handbook creator with automated Word file generation and AWS deployment.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap AWS EC2

WorkInDK, Denmark

2017.01-2017.12

Project: Job Recruitment Portal

- Developed and deployed a recruitment portal used by hundreds of candidates and 50+ companies.
- Implemented profile management, resume building, job search, notifications, PDF generation, reporting and automated database backups.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap RDLC

NewGLink Corp, USA

2019.02-2019.04

Project: BCBA Web Portal

- Developed a BCBA web portal for a New Jersey school, enabling behaviour tracking, reporting and real-time communication for students and staff.
- Implemented real-time application communication using SignalR 2.

ASP.NET MVC Entity Framework SQL Server jQuery Bootstrap SignalR2

ADDITIONAL EXPERIENCE

Fiverr.com - Freelance Software Developer & Tutor

2014.01-2023.08 (Paused)

Delivered 650+ software projects with a 100% 5-star client satisfaction rating, working directly with a diverse international client base across multiple sectors.
Mentored 100+ students in software development and programming.

National School of Business Management - Programming Instructor

2014.11-2015.04

Taught programming fundamentals and practical software development to 100+ BSc students while supporting lab maintenance and examination activities.
