SUPUN NIMANTHA

SENIOR FULL-STACK SOFTWARE ENGINEER

Auckland, New Zealand | 022-029-0157 | supunnimantha.edu@gmail.com | LinkedIn | Portfolio | GitHub | Fiverr

Core Tech Stack: C#.NET, React, Next.js, TypeScript, JavaScript, jQuery, Python, SQL Server, Azure, AWS, Terraform, AI integrations

AI development tools: Codex, Claude Code, Claude Design, Cursor

Work rights: Open Work Visa - valid until 03 Jun 2029

Senior full-stack software engineer with 10+ years delivering web, mobile and cloud applications across clinical research, finance, food, transport, recruitment and retail; now focused on AI-enabled full-stack and cloud systems.

WORK EXPERIENCE

FoodME Ltd (Favour), Auckland, NZ

Full-Stack Software Engineer - Part-time Contract

Project: AWS-to-Azure Cloud Migration | Jul 2026 - Present

- Migrate Django services from AWS to Azure; provision App Service, MySQL Flexible Server, Blob Storage, Key Vault, APIM and private networking with Terraform.
- Maintain React Native features; test mobile workflows with Android emulators and iOS TestFlight, using AI-assisted automation and UI refinement.
- Investigate AWS cost drivers and savings opportunities; document migration runbooks and reproducible infrastructure.

Tech: Django, Python, React Native, Terraform, Azure, AWS, MySQL, APIM, Key Vault, TestFlight

Full-Stack Software Engineer Intern - MSc Capstone (A+)

Project: Retailer Integrations & AI Product Matching | Nov 2025 - Feb 2026

- Built React Native retailer-selection, store-pricing and cart workflows with Django APIs and Python/Selenium product pipelines.
- Built OpenAI-powered classification assigning ingredient tags to 6,471 of 8,687 New World products (74.5% coverage), with output validation and non-food filtering.

Tech: React Native, Redux, Django, Python, Selenium, OpenAI, REST APIs, AWS Lambda, S3, RDS, TestFlight, Android Emulator

AvanSight Inc., CA, USA

AI Engineer - Project-based

Project: AI Report Builder & Trial Master File (TMF) Digitisation | Jun 2026 - Present

- Built a .NET / Next.js platform for clinical research teams to annotate examination PDFs and generate Word reports across 131 subjects at 48 sites; moved from Document Intelligence to multimodal Azure OpenAI.
- Annotated 600+ visits with 5,600+ findings; 89% were rated high confidence, with uncertain findings routed for human review.
- Generated Word reports for 705 visits, extracting 2,922 handwritten values and flagging 238 (~8%) for review; used sandboxed execution, source validation and versioned prompts.
- Orchestrated 4,805 model runs in under three weeks with ~94% completing successfully, up to 16 concurrent runs and automatic retries; delivered reports to SharePoint with Teams notifications and cost monitoring.
- Built a QA Agent to validate digitised reports and create DartAI tickets when issues were detected.
- Developing RAG-based narrative generation over digitised TMF and Word reports using embeddings, a vector database, Microsoft Agent Framework, MCP and LangChain.
- Migrated repositories to self-hosted Gitea and Gitea Actions, deployed with Docker on a Hostinger Ubuntu VPS.

Tech: C#, ASP.NET Core, Next.js, TypeScript, Python, xUnit, Azure OpenAI, Document Intelligence, RAG, Docker, Gitea

Team Lead Software Engineer & Offshore Manager

Project: Clinical Trial Management Platform | Apr 2020 - Apr 2025

- Grew a clinical-trial prototype into a multi-company platform; evolved MVC, JavaScript, jQuery, Ajax, Bootstrap and LESS modules to TypeScript, React, Next.js and Web API.
- Built data-intensive workflows and drill-down reporting using GraphQL/HotChocolate, Dapper, SQL Server, AG Grid, Zustand, TanStack and AMCharts.
- Led 8 developers, 3 QA engineers and a Product Manager on CRO study and FDA submission workflows; recruited, mentored and reviewed code, with TDD and Jenkins/GitHub Actions CI/CD.

Tech: C#, ASP.NET MVC, Web API, React, Next.js, SQL Server, GraphQL, Dapper, Zustand, TanStack, Jenkins, TDD

EARLIER EXPERIENCE & CONTRACT PROJECTS

Fajar Agung Group, Indonesia

Full-Stack Software Engineer - Remote Contracts

Project: Field Staff Tracking; Fleet, Inventory & Warehouse Management | 2017 - 2025

- Directed developer and QA delivery of staff tracking, attendance and task management with offline synchronisation, Firebase and Google Maps APIs for GPS/navigation.
- Delivered bilingual fleet, inventory and warehouse modules with purchasing, stock, role-based access and reporting; hosted services on AWS EC2/RDS.

Tech: ASP.NET MVC, React, Next.js, React Native, SQL Server, MySQL, Firebase, Docker, AWS EC2, RDS, Route 53

Hostgsm LLC, USA

Full-Stack Software Engineer - Remote Contracts

Project: Transport Reservation & Dispatch SaaS | 2017 - 2025

- Coordinated development and QA of multi-tenant Transport Reservation & Dispatch SaaS, with VOIP/SMS, dashboards and responsive booking workflows.
- Modernised legacy booking functionality and delivered Inventory Lookup and Bus Booking desktop tools.

Tech: C#, Web API, EF Core, React, Next.js, SQL Server, WinForms, Docker, Kafka, VOIP/SMS

EmetSoft, Sri Lanka

Trainee / Full-Stack Software Engineer - Multiple Contracts

Project: Municipal ERP & Online Payments; Field Service; Cemetery Management | Feb 2016 - Jul 2019

- Modernised municipal finance, rate collection, taxation, treasury, HR and licensing modules, migrating legacy VB6 functionality to VB.NET.
- Integrated payment gateways and online rate collection for Colombo (CMC) and Dehiwala-Mount Lavinia (DMCC) Municipal Councils.
- Delivered field-service web/Android tools with GPS tracking for 30-40 officers, plus a CMC cemetery system covering approximately 50 acres.

Tech: ASP.NET MVC, VB.NET, Entity Framework, SQL Server, Crystal Reports, jQuery, Bootstrap, Android, Google Maps APIs

SELECTED ADDITIONAL PROJECTS AND EXPERIENCE

Vision Testing App | MSc project | Jul - Sep 2025: Gamified children's acuity testing with logMAR scaling and data export; React, FastAPI and PostgreSQL. Live App | Demo Video

Andere Corporation, USA | Employee Handbook Creator | Jan 2017 - Dec 2019: Supporting all 50 US states; questionnaire-driven Word generation, document management and AWS deployment. ASP.NET MVC, SQL Server, EC2, RDS, Route 53.

WorkInDK, Denmark | Recruitment Portal | Jan - Dec 2017: For hundreds of candidates and 50+ companies, with CV creation, PDF generation, job search and reporting. ASP.NET MVC, SQL Server, RDLC, Rotativa.

NewGLink Corp, USA | School BCBA Portal | Feb - Apr 2019: For behaviour tracking, reporting and real-time communication. ASP.NET MVC, SQL Server, SignalR 2.

Fiverr | Developer & Tutor | Jan 2014 - Aug 2023: 650+ software projects; mentored 100+ students.

NSBM | Programming Instructor | Nov 2014 - Apr 2015: Taught 100+ BSc students.

EDUCATION & CERTIFICATIONS

- **Master of Software Engineering** | Yoobee Colleges, Auckland
  Results: 7 A+ and 1 A; industry capstone: A+ (95%) | 2025 - 2026
- **BSc Management Information Systems** | University College Dublin
  GPA: 3.58 | 2012 - 2015
- **Oracle Certified Professional, Java Programmer** | 2014
